

Green Skills Training & Bootcamps

Future-Ready Workforce: Green Skills for Sustainable Growth

Who is it designed for?

This program is specifically designed for all employees within businesses, extending beyond specialised technical roles (e.g., EV mechanics). It targets SMEs, educational institutions, and training providers who are looking to equip their workforce with the general skills needed for a sustainable future.

Why it benefits the Local Authority?

Green Skills Training directly benefits the Local Authority by upleveling businesses' skills and awareness of sustainability topics across the board. By preparing businesses for the growing green economy and forthcoming regulations, it contributes to boosting employment and overall business growth and competitiveness within the local area. This proactive approach helps create a resilient and adaptable local economy.

What participants gain out of the program?

Participants gain the specific green skills necessary for a sustainable future in an ever-changing environment.

The curriculum can include vital topics such as carbon literacy, strategy, marketing, supply chain management, influencing others, and measuring sustainability. This equips businesses to understand what they need to know, preparing them for upcoming regulations and enabling their teams to thrive in the green economy.

About Sustainable X

We are Sustainability Consultants that help organisations focus on what matter. We aim to share knowledge, drive impacts and support businesses and organisations to meet their objections through Sustainability initiatives.
